Google Hangouts Meet	Online Video	<a href="https://google.meet.com">google.meet.com</a> part G Suite	Students are keeping their regular schedule at home and teachers have learned to use Google Meet to screen share and record meetings. They "pin" students so everybody sees who is talking and the other students have learned to mute until they are ready to talk. Students can easily access their courses on the google.meet.com site each day as there is a list of daily meetings since students have been invited via the Classroom calendar. Not an original resource but one that has worked very well so far.
